 SUNI NGUYEN |  <https://ninguyen94.github.io/portfolio/>

Chico City, California - United States

OBJECTIVE

I just moved to the United States after 9 years working in Japan as a Senior Android Developer. At the moment, I'm working as a freelancer on a project where I'm refactoring the codebase using Clean Architecture and modular design, which makes the app easier to maintain and test. Before that I worked on many high-quality mobile applications. I'm very comfortable with Kotlin, Java, and Android development tools like Jetpack Compose, Dagger, Retrofit, Room Database. Now I'm looking for a new opportunity where I can apply my experience, keep learning, and grow with a great team.

TECH STACK

- **Programming Languages:** Kotlin (Expert), Java (Expert) , JavaScript, Python
- **Android Frameworks:** Jetpack Compose, XML Layouts, ViewModel, LiveData, Room, Navigation Component, WorkManager, Paging, Hilt, Dagger, DataStore
- **Architecture:** MVVM, MVI, Clean Architecture, Repository Pattern, UseCase Pattern, SOLID Principles, Modularization
- **Database Systems:** Room, SQLite, Firebase Realtime Database, Realm, PostgreSQL, MongoDB
- **Asynchronous Programming:** Coroutines, Flow, RxJava/RxKotlin
- **Networking:** REST APIs, Retrofit, OkHttp, GraphQL
- **Backend & Cloud:** Firebase (Auth, Firestore, FCM, Analytics, Crashlytics), AWS (S3, Cognito)
- **Testing:** JUnit, Espresso, Mockito, Robolectric, UI Automator
- **Tools & DevOps:** Android Studio, Git, Gradle, Proguard, GitHub Actions, GitLab CI, Bitrise, Jenkins, ADB
- **Project Methodologies:** Scrum, Agile, Kanban, Waterfall

EXPERIENCE

- **PlayNext Lab Inc. ** March 2018 - June 2025
Senior Android Developer Tokyo, Japan
 - Led the development of core features for large-scale Android apps such as J.Score, My Sony, and Elgana, achieving 1.5M+ downloads across Japan.
 - Refactored legacy codebases into Clean Architecture across 3 major projects, increasing unit test coverage from 25% to 85% and reducing crash rates by 40%.
 - Implemented a camera-based eKYC verification flow, enhancing security and regulatory compliance for a financial application.
 - Developed and optimized BLE beacon scanning and background processing, resulting in a 3x increase in user engagement with location-based promotions.
 - Integrated WebSocket communication for real-time messaging and task updates with custom protocols.
 - Participated in quarterly security audits and implemented critical features such as certificate pinning and device attestation, helping achieve ISO/IEC 27001 compliance.
 - Worked closely with Japanese product managers and QA teams, ensuring alignment with financial, legal, and quality standards.
 - Mentored junior developers, contributed to architectural decisions, and helped streamline onboarding through modularization.
- **FPT Software ** June 2015 - March 2017
Android Developer Ho Chi Minh, Vietnam
 - Contributed to the development of Smart TV and assistant apps for international clients, gaining experience with large-scale B2C applications.
 - Collaborated in fast-paced project teams, adhering to professional development workflows and documentation standards.
 - Improved application UX and fixed critical bugs in tight delivery timelines.

PROJECTS

- **J.Score – AI Credit Scoring & Personal Loan App** 2018 – 2025
Role : Senior Android Developer
 - Development of the AI Score UI and multi-step onboarding forms with animation and error handling.
 - Implemented eKYC process using camera-based OCR and server-side document verification.
 - Refactored large legacy modules into Clean Architecture, improving maintainability and unit test coverage.
 - Integrated encrypted local storage, certificate pinning, and device integrity checks to meet banking-level security standards.
- **My Sony – Customer Engagement & Retail Experience App** 2019 – 2023
Role : Senior Android Developer, Android Team Leader
 - Developed Bluetooth Beacon scanning module using Android BLE APIs.
 - Real-time location-based campaigns enabled by beacon-triggered content.
 - Optimized battery consumption and ensured compliance with Android background execution limits.
 - Integrated beacon analytics to track user proximity, dwell time, and campaign performance.
- **Elgana – Secure Enterprise Chat & Task Management App** 2020 – 2025
Role : Senior Android Developer
 - Built chat and task modules using WebSocket and custom protocol handling.
 - Improved message sync and offline reliability for unstable network environments.
 - Drove architectural transition to Clean Architecture (UI, Domain, Data layers).
- **Other Projects at PlayNext Lab Inc.:** 2018 – 2025
Role : Android Developer
 - MobiAgent / MobiWork: Android business apps for field operations and reporting.
 - Sampo Japan Insurance App: Developed features for insurance claim tracking.
 - NTT OCN Phone / Shanai Talk: VoIP and internal communication apps for enterprise clients.
- **Projects at FPT Software:** 2015 – 2017
Role : Android Developer
 - KoBe Smart TV: Android-based Smart TV interface with streaming and media control.
 - Z-Assist: Voice assistant features for home automation and mobile control.
 - nPower: Utility app for remote monitoring and device management.

EDUCATION

- **FPT University** 2012 – 2016
Software Engineering Ho Chi Minh, Vietnam

HONORS AND AWARDS

- **MVP of the Year – 2023**
PlayNext Lab Inc.
 - Recognized as the Most Valuable Performer for exceptional contributions and impact across multiple Android projects at PlayNext Lab Inc.
- **Full 4-Year University Scholarship**
FPT University
 - Awarded for outstanding academic performance throughout high school; top-tier merit-based scholarship granted to nationally ranked students.
- **First Prize in INTEL ISEF 2012**
Intel International Science and Engineering Fair
 - First Prize in National Contest about science for high school student

ADDITIONAL INFORMATION

Languages: English, Japanese, Vietnamese

Interests: Reading, Basketball (Lakers fan), Camping
